

ATE Evaluation Practice: Lessons from the Field

Preconference workshop at the ATE PI Conference
October 22, 2014

EvaluATE
Evaluation Resource Center for
advanced technological education

This material is based upon work supported by the National Science Foundation under Grant No. 1204683. The content reflects the views of the authors and not necessarily those of NSF.

EvaluATE Mission

To promote the goals of the ATE program by

- partnering with ATE projects and centers to strengthen the program's evaluation knowledge base
- expanding the use of exemplary evaluation practices
- supporting the continuous improvement of technician education throughout the nation

EvaluATE Activities

- 4-6 webinars per year
- Quarterly newsletter
- Annual survey of ATE grantees
- Annual workshop at ATE PI conference
- Website

The screenshot shows the homepage of the EvaluATE website. At the top left is the logo "EvaluATE" with the tagline "Evaluation Resource Center for advanced technological education". To the right are social media icons for Facebook, Pinterest, Twitter, and LinkedIn, along with a search bar. A navigation menu includes links for HOME, ABOUT, LIBRARY, NEWSLETTER, BLOG, WEBINARS, and CONTACT. The main content area features a large image of an open book with the text: "Our newly organized library has a number of resources that can help you with evaluation." To the right of this image is a text box explaining that EvaluATE is the evaluation resource center for the National Science Foundation's Advanced Technological Education program, providing webinars, resources, and opportunities for engagement. Below this are four columns: "Blog" (welcome message), "Highlights" (ATE 2014 Survey Fact Sheet, Evaluation Planning Checklist for NSF-ATE Proposals, ATE Survey Questions), "Recent Library Additions" (Logic Model Template for ATE Projects & Centers, Identifying stakeholders and their roles in an evaluation, ATE Evaluation Survey 2005 at a glance: Centers), and "Join Our Mailing List" (email input field, Go button, and Privacy by SafeSubscribe logo). A secondary navigation menu is at the bottom, and the footer contains the NSF logo, a disclaimer, the "THE EC EVALUATION CENTER" logo, and the "W" logo for West Michigan. Contact information and copyright notice are also present.

Activity materials

Feedback survey

Agenda

1:00	Welcome, introductions, and ice breaker
1:20	Lesson from the Field 1: Managing multi-site data collection (Candiya)
1:40	Q&A
1:50	Lesson from the Field 2: Following up with professional development participants (Amy & Bruce)
2:05	Q&A
2:15	Break
2:30	Idea Exchange: ATE evaluation challenges and solutions
2:50	Activity 1: Multisite data collection (Lori)
3:15	Activity 2: Planning follow-up (Lori)
3:40	Closing comments/Q&A, feedback survey
4:00	Adjourn

POSTER & MEDIA OUTREACH

S.U.R.E.
Seawolf Underwater Robotics Engineering
Coppiah-Lincoln Community College
Wesson, MS

...al class Remotely Operated purpose of taking part in May, Washington. The g the SEA WOLF II in un- vision observing systems- ash-Lincoln Community ty to the MATE Interna- construction are the re- of the Seawolf Under- WIN to adaptive basic is an ROV that comes

...LF II's design was to forming mission tasks, requirements for speed, staying a small, com- is with missions in a minimal n't's success.

...LF II is designed ght frame, aluminum ith this multipurpose em specific missions.

...er created to ensure ly, lightweight manip- ain be utilized for a t. Adjustable thruster consisting of six Sea- WOLF II's power supply, and engineered for

...ents. Launching a New of the world will be tak- tion, and maintenance.

...was able to get the job training underwater is in Washington, the world application.

Structure

The body of SEA WOLF II was designed and tested in hydroxide and solid brine. It is constructed of two main components: the metal frame and the electronics. The frame is made of aluminum and is designed to be lightweight and strong. The electronics are housed in a custom-designed enclosure.

Electronics Board

The custom designed motor control board for the SEA WOLF II was designed in the team's own facility, and the PCB is the first to operate on a 5V circuit board for four bridge chips, which run the motor and transmitter. The result is a compact, low-cost PCB, which is one of the strengths of the design.

Electronic Housing

The electronic housing houses an Arduino Mega 2560, which provides pulse width modulation and analog signals to the two custom-made motor boards. These boards drive the thrusters and manipulate the ROV from the surface to suit. It is a DC converter, also housed in the tube, which converts the surface 48V to 5V, then regulated to 3V. The 3V powers the Arduino, camera and motor, and the 5V powers the motor.

Description of SEA WOLF II

Cameras

The ROV is equipped with three color cameras, two of which are mounted on the front. The cameras are mounted on a custom-designed housing tube, which also houses the electronics. The cameras are designed to provide a wide field of view and are capable of recording video.

Manipulator

The body of the manipulator arm was designed to be lightweight and strong. It is constructed of aluminum and is designed to be able to handle a variety of tasks. The manipulator is controlled by the ROV's computer system.

Thrusters

The SEA WOLF II features six custom-designed thrusters. Two of these are mounted on the front of the ROV, and the other four are mounted on the sides. The thrusters are controlled by the ROV's computer system and provide a full range of movement in all directions, including a climbing thrust.

Some numbers for you...

Some numbers for you...

- 23 regionals lead to 1 culminating competition
- 4 competition classes
- Grades 4 – 16
- In 2014...
 - 580 teams
 - ~2,300 students
 - ~600 teachers
 - ~1,000 industry

Complementary Activities

Summer Institutes

Regional workshops

800-page textbook

Curriculum + videos

ROV kits

At-sea internships

Selected Evaluation Questions

Selected Evaluation Questions

How does the ROV program affect...

Students'

- Awareness of STEM careers?
- Intention to pursue STEM career?
- Interest in studying STEM?
- STEM knowledge and skills?
- 21st Century skills?

Teachers' confidence facilitating STEM learning experiences?

Parents' support of their children's interest in STEM careers?

Selected Evaluation Questions

Activity	Tools
Workshops	Pre-post surveys & knowledge tests
Summer Institutes	Post-survey & 9-month follow-up
Competitions	Post-surveys, interviews, observations, coordinator reports

In development...

Pilot study: longitudinal follow-up with econometric models

Post-Competition Surveys

<u>Survey</u>	<u>Languages</u>	<u>Must Administer?</u>
Students	English/Spanish	Required
Teachers	English	Required
Parents	English/Spanish	Optional
Judges	English	Optional

Data Collection Challenges

OBSTACLES

- 23 sites
- Managed by 23+ coordinators
- Variety of venue types
- Multiple surveys

CHALLENGES

1. **Motivation:** How do you motivate others to administer surveys?
2. **Process:** How do you create an EASY process?

Year 1 (What not to do)

2010	
Type	Paper & Survey Monkey
Coordinated?	Coordinators
Printed?	Coordinators
Returned?	Coordinators
Data entered?	MATE
Coverage	10 sites

Dear Student:

This survey is being circulated by the Marine Advanced Technology Education (MATE) Center, headquartered at Monterey Peninsula College in Monterey, California. The MATE Center is a national program funded by the National Science Foundation to help prepare students for careers as marine professionals. The information that you provide on this survey is confidential and important to us! When you complete the survey, return it to your instructor, who will return it to the MATE Center. You can also return it directly to a MATE Center representative.

Thank you!

Please print your school/team name: _____

Please print your teacher's name: _____

1. Is this your first time building an ROV?
 - Yes
 - No
2. Did you know what an ROV was before you built one?
 - Yes
 - No
3. Before building your ROV, how much did you know about careers in marine science, technology, and engineering?
 - A lot
 - Some
 - A little
 - Nothing
4. After building your ROV, do you know more about marine careers? How much more?
 - A lot more
 - Some more
 - A little more
 - No more

2010-10-29 11:55:58 AM

Year 1 Lessons Learned

Downsides

- Spotty coverage
- Burden on coordinators
- Multiple datasets
- Slow data entry

Upsides

- Inexpensive

Next steps...

- How to make data collection easy for the coordinators?

Year 2 Approach

	2010	2011
Type	Paper & Survey Monkey	Scannable
Coordinated?	Coordinators	MATE
Printed?	Coordinators	MATE (campus)
Returned?	Coordinators	MATE sends box & UPS label
Data entered?	MATE	Scanned
Coverage	10 sites	17

Dear Student

This survey is being circulated by the Marine Advanced Technology Education (MATE) Center, headquartered at Monterey Peninsula College in Monterey, California. The MATE Center is a national program funded by the National Science Foundation to help prepare students for careers as marine professionals. The information that you provide on this survey is confidential and important to us! When you complete the survey, return it to your instructor who will return it to the MATE Center. You can also return it directly to a MATE Center representative.

Please use a #2 pencil to answer the questions

Thank you!

Q1. How would you rate your experience building and competing with your ROV?

Excellent
Good
Fair
Poor
Very poor

Q2. Was this your first time building an ROV?

Yes
No

Q3. Did you know what an ROV was before you built one?

Yes
No

Q4. Before building your ROV, how much did you know about careers in marine science, technology, and engineering?

A lot
Some
A little
Nothing

Q5. After building your ROV, do you know more about marine careers?

Yes
No -- Skip to Q7

Q6. How much more do you know about marine careers now?

A lot more
Some more
A little more
No more

Q7. Are you interested in having a career in marine science, technology, or engineering?

Yes
No
Not sure

Regional event info

Year 2 Lessons Learned

Upsides

- Better coverage
- Single, clean dataset
- Fast data entry

Downsides

- More \$\$: printing & mailing
- One-time cost: scannable form set-up
- Time-consuming to coordinate

Next Steps... How to simplify survey distribution?

Year 3 Approach

	2010	2011	2012
Type	Paper & Survey Monkey	Scannable	Scannable
Coordinated?	Coordinators	MATE	MATE
Printed?	Coordinators	MATE (campus)	Local Kinko's
Returned?	Coordinators	MATE sends box & UPS label	Kinko's: box MATE: FedEx label
Data entered?	MATE	Scanned	Scanned
Coverage	10 sites	17	21

Kinko's Process

1. Coordinators identified a local Kinko's
2. MATE emailed files and printing instructions to Kinko's
3. MATE mailed pre-printed FedEx labels to coordinators
4. Kinko's printed surveys and provided an empty FedEx box
5. Coordinators picked up the surveys, administered them, and returned the completed surveys via FedEx

Year 3 Lessons Learned

Upsides

- Eliminated shipping time/cost to coordinators

Downsides

- Increased printing costs
- Possible miscommunication with Kinko's
- Time consuming to manage communication

Next Steps... How to simplify the coordination?

Year 4 Approach

	2010	2011	2012	2013
Type	Paper & Survey Monkey	Scannable	Scannable	Scannable
Coordinated?	Coordinators	MATE	MATE	Excel form: BaseCamp
Printed?	Coordinators	MATE (campus)	Local Kinko's	Evaluator
Returned?	Coordinators	MATE sends box & UPS label	Kinko's: box MATE: FedEx label	Evaluator sends box & UPS label
Data entered?	MATE	Scanned	Scanned	Scanned
Coverage	10 sites	17	21	21

Year 4 Lessons Learned

Upsides

- Better quality control
- Less expensive than Kinko's or campus
- Less administrative burden on MATE staff

Downsides

- Still some coordination time required

Next Steps...

- How to simplify coordination?
- How to eliminate shipping to international sites?

Year 5 Approach

	2010	2011	2012	2013	2014
Type	Paper & Survey Monkey	Scannable	Scannable	Scannable	Scannable & Online option
Coordinated?	Coordinators	MATE	MATE	Excel form: BaseCamp	EmailMeForm (www.EmailMeForm.com)
Printed?	Coordinators	MATE (campus)	Local Kinko's	Evaluator	Evaluator
Returned?	Coordinators	MATE sends box & UPS label	Kinko's: box MATE: FedEx label	Evaluator sends box & UPS label	Evaluator sends box & UPS label
Data entered?	MATE	Scanned	Scanned	Scanned	Scanned & online in same dataset
Coverage	10 sites	17	21	21	16

Year 5 Lessons Learned

Upsides

- Simplified coordination
- Eliminated international shipping

Downsides

- Difficult for int'l sites without computers

Marine Advanced Technology Education

Motivation

Goal: Make coordinators co-owners in evaluation

Partners' meeting: presented...

1. Evaluation plan
2. Overall results
3. "The Evaluation and You"

"The Evaluation and You"

Shared all survey forms

Trained how/when to implement each

Data Collection Tools <small>(All tools will be revised for Year Two.)</small>	Timing, Tips and Other Notes
Teacher/Mentor Workshops: Pre-Surveys & Post-Surveys	<ul style="list-style-type: none"> At your teacher/mentor workshops: Administer the pre-survey first thing, before any instruction. Administer the post-survey at the end of the training. These are intended to be used at the introductory workshop. If they are used at subsequent workshops, please separate those surveys and let me know so I can analyze those separately.
Competition Surveys: Student Survey Teacher/Mentor Survey Parent/Family Survey	<ul style="list-style-type: none"> There are 3 separate competition surveys: 1) students, 2) faculty/mentors, and 3) parents/family. Location: The surveys need to be administered AT THE COMPETITION or other culminating ITEST event please. Print/Web: Student and faculty surveys are available in printable versions or via the web. If you choose to administer via the web, computers with internet access need to be available at the competition. Incentives: Some regions use incentives to motivate people to complete the surveys, such as t-shirts or food. The use of survey incentives is entirely up to you, but please let me know if you do use them, as I'd like to mention it in the report. Parents who mentor teams: In this case, they are welcome to complete both the parent survey and the

“The Evaluation and You”

Provided their region’s results

Discussed how to use results...

- Improve competition
- Recruit students, teachers, administrators, sponsors
- Use in PR, grant applications
- Create “highlights” sheets for events & conferences

Developing Leaders in Biosciences: Evaluating an ATE Biotechnology Education Program

Bruce Nash, Assistant Director for Science
Amy Nisselle, Multimedia & Evaluation Manager

Cold Spring Harbor Laboratory
DNA LEARNING CENTER

Genomic Approaches in Biosciences

Aim

Strengthen biotech instruction by training educators to implement experiments integrating four major technologies of the genome era

1. PCR
2. DNA sequencing
3. RNA interference
4. Bioinformatics

Cold Spring Harbor Laboratory
DNA LEARNING CENTER

Genomic Approaches in Biosciences

Collaboration

- DNA Learning Center
- Bio-Link careers resources
- 12 community colleges

Week-long summer educator workshops

- Original grant: 2011-13
- Extension: 2013-15 ("train the trainer")

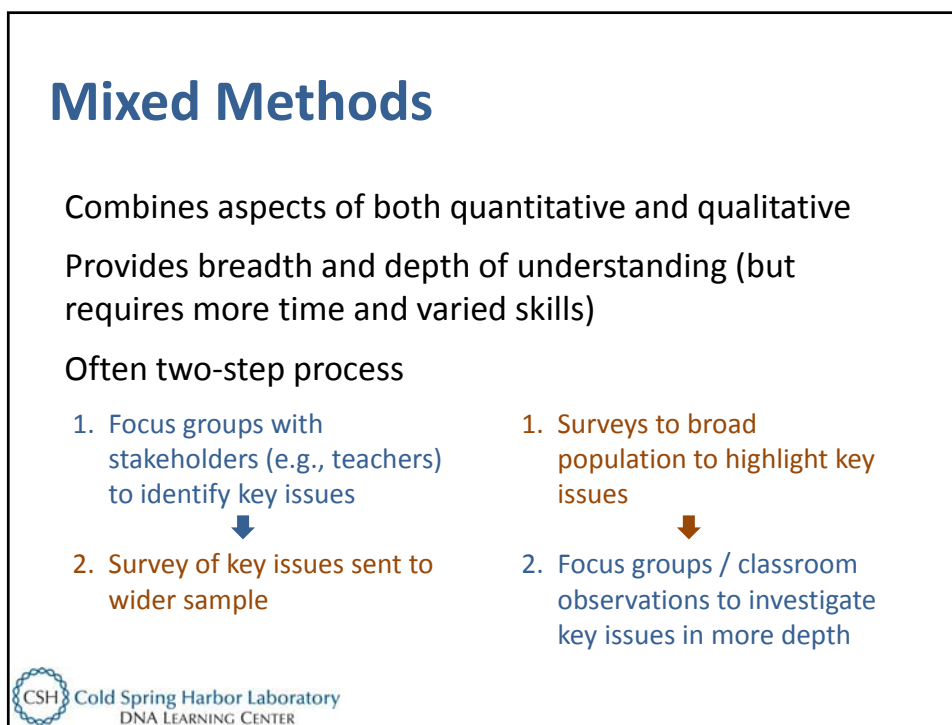

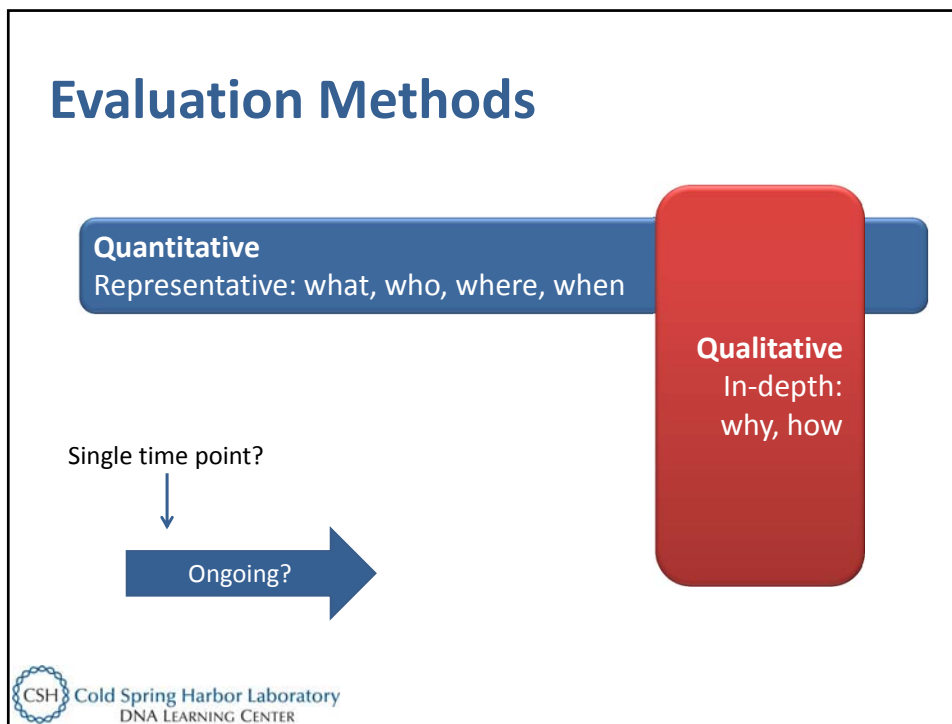

Curriculum

- Theoretical, laboratory, and computer technology materials
- Practical advice on classroom management
- Career exploration

Evaluation Objectives

1. What are the **teacher impacts** of the program on:
 - a) confidence to teach program curricula?
 - b) Implementation/ classroom behavior?
2. What are the **student impacts** of the program in terms of:
 - a) experiences of student-centered research and learning?
 - b) preparation for careers in biotechnology?
3. What are the **barriers and facilitators** to program implementation (teacher, student, institution, other)?

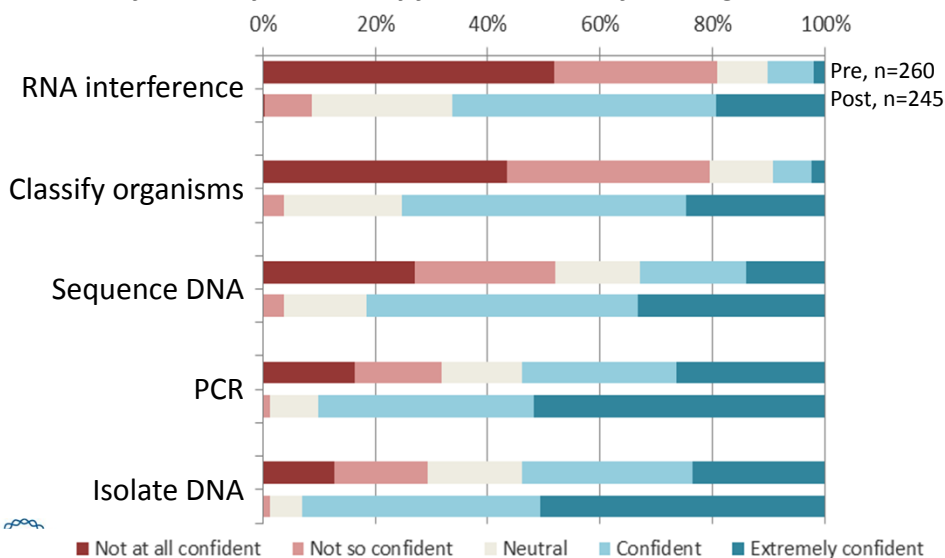

Methods Matrix for Teacher Impact

	<i>Data collection tool</i>	<i>Evaluation Objective</i>	
		Teacher confidence	Implementation/Teacher behavior
 Time	Pre-workshop survey	✓	
	Post-workshop survey	✓	
	Follow-up survey (12 mo)	✓	✓
	Long-term case study (18 mo)		
	Classroom observation	✓	✓
	Teacher interview	✓	✓
	Student focus group		✓

Change in Confidence: Labs

"How confident do you currently feel to teach the following lab methods?"

Qualitative Data

"Students have 2 weeks that incorporate isolating their taste bud receptor as part of a larger lab report and investigation of genetic variation within a population... It incorporates both the biotechnology along with literature research, classical Mendelian inheritance of single traits and Hardy-Weinberg predictions."

Teacher, 12mo f-up survey

"Biotech is the only [class] where we've learnt stuff that we can apply when we get a job... where I feel a little more confident in that, 'Oh, I can do this in a lab.'"

Student, long-term case study focus group

Dillman, D., Smyth J., & Christian, L. (2014). *Internet, Mail, and Mixed-Mode Surveys: The Tailored Design Method*. (4th Ed.) John Wiley & Sons.

Dillman Method: DNALC Survey Responses

Using Evaluation Data

To refine current program

- Curricula (more time for bioinformatics, highlight careers)
- Logistics (participant selection)
- Follow-up (tutorials, online lesson plans, collaborations)
- Extend evaluation program (SURE data re independent student research experiences)

To fund new/expanded programs

- Use these data in all grant proposals (teacher training, workshops, student research, use of materials, *etc.*)
- Expanded existing NSF ATE program in response to demand (analyse data from “train the trainer” model *cf* original program)
